
QuickBooks Enterprise Solutions provides a seamless way for every part of your organization to share financial information—helping you work smarter and faster. When you have QuickBooks Enterprise Solutions, people across your company can see the latest data in real time and make better decisions that drive stronger performance. The new, totally reimagined v13 of QuickBooks Enterprise Solutions includes a full suite of enterprise-ready solutions designed to help businesses get the most from their QuickBooks data. With this release, we've redesigned everything from the core system to reports so they're more powerful and intuitive than ever before. Plus, there are new features to help you get rid of any information you don't need, dramatically improve safety and security, and eliminate the monthly drain on your financial bottom line. QuickBooks Enterprise Solutions v13 offers powerful reporting tools for business intelligence that show how your company is organized. Consolidated lists give you all of your individual reports—instead of just the one that shows up in QuickBooks Online—so they're easier to read and understand. You can easily access the most important reports in one place; drill down into details; make them more focused; and share them with other users in your organization. With QuickBooks Enterprise Solutions v13, it's easier than ever to make payroll calculations more accurate. Figure out your payroll liability up to two weeks before the end of the month. And, if you make an error, QuickBooks Enterprise Solutions can give you an accurate picture of payroll activity without having to go back in time. QuickBooks Enterprise Solutions v13 offers a new way to organize your company data so you can have a quick and easy view of how it's flowing through your business. Your financial data is organized into easily digestible charts and graphs—even giving a bird's-eye view of how every part of your organization is doing. You'll have one-click access to information about each department. And you can quickly spot problems that could affect cash flow, even from afar. QuickBooks Enterprise Solutions v13 offers a simpler way to keep you on top of your business. You can set up progress reports that show how far you are through a project, convey critical changes in how work is progressing, and help ensure that budgets are being adhered to. Plus, new summary reports give you an instant snapshot of all the data you need—without having to dig for it or jump from one report to another. QuickBooks Enterprise Solutions v13 offers an easy new way to manage projects across your organization, so everyone is working at full capacity—and delivering on time. With personalized dashboards, it's easy to see which team members are most in demand. And you can take full advantage of your staff's strengths to free up time that others can use for more important projects. QuickBooks Enterprise Solutions v13 offers new, intuitive tools for streamlining large, complex jobs. You can now create multiple-step jobs with one click. And see the whole job in one view, so it's easy to track progress. QuickBooks Enterprise Solutions v13 is engineered to work with the software—and equipment—you already have in place, so it doesn't throw off your enterprise applications—or disrupt the workflow of your teams.
